Fossil Creek Power Plant.

Mrs. I. E. Tutt of Los Angeles arrived in the city yesterday morning from Prescott and the northern part of the territory. Mrs. Tutt is engaged in the construction of an electric power plant on Fossil creek for the purpose of supplying electric power and light to Prescott, Jerome and the Poland mine. This enterprise has been described by the Republican at different times. In the latest description of it, in a letter sent from Prescott, a typographical error appeared, stating that it was expected that 1,000 horse power would be developed. It has already been shown that there is sufficient water at the point where the plant is to be established to furnish from 4,000 to 4,500 horse power. It will take more than 1,000 horse power to supply the Poland mine, and as much more for Prescott. Mrs. Tutt is on her way to Globe, from which point she will go to Fossil creek. She is accompanied by one of her engineers. She has been extensively engaged in the construction of electric light plants in Southern California. She owned plants at Redondo, Long Beach and Terminal Island.—Republican.

A Remarkable Cure for Diarrhoea.

"About six years ago, for the first time in my life, I had a sudden and severe attack of diarrhoea," says Mrs. Alice Miller of Morgan, Texas. "I got temporary relief, but it came back again and again, and for six long years I have suffered more misery and agony than I can tell. It was worse than death. My husband spent hundreds of dollars for physicians' prescriptions and treatment without avail. Finally we moved to Bosque county, our present home, and one day I happened to see an advertisement of Chamberlain's Colic, Cholera and Diarrhoea Remedy with a testimonial of a man who had been cured by it. The case was so similar to my own that I concluded to try the remedy. The result was wonderful. I could hardly realize that I was well again, or believe it could be so after having suffered so long, but that one bottle of medicine, costing but a few cents, cured me."
